Objective

As a fourth-year Artificial Intelligence and Cybersecurity student at KFUPM, I bring hands-on experience developing machine learning models, programming in Python and Java, and analyzing data to solve real problems. I am seeking to join Ma'aden's University Tracking Program to grow my technical and professional skills within the Kingdom's mining and industrial sector while contributing my AI and data analysis capabilities to the company's digital transformation initiatives.

Education

King Fahd University of Petroleum and Minerals (KFUPM) — Dhahran, Saudi Arabia

Bachelor of Science in **Artificial Intelligence and Cybersecurity**, Concentration in Data Science and Analytics

Aug 2023 – Dec 2028

GPA: 3.63 / 4.00

Relevant coursework:

- Deep Learning, Machine Learning, Artificial Intelligence, Natural Language Processing, Computer Vision

KAUST AI Academy — Stage 1 online; Stages 2 and 3 on-site at KFUPM

Advanced Artificial Intelligence Program

Dec 2024 – Jan 2025

- Completed Stage 1 in Python programming and calculus foundations, earning two Coursera certifications
- Built supervised and unsupervised machine learning models in Stage 2 to strengthen understanding of core deep learning architectures
- Explored convolutional neural networks and object detection models such as YOLO to gain hands-on experience with computer vision techniques
- Developed a convolutional neural network in Stage 3 to detect cancer from MRI scans, achieving 88% accuracy
- Trained a second convolutional neural network on a dataset of facial images aged 1 to 70 to predict age with reasonable accuracy

Experience

KFUPM WorldEvent — Dhahran, Saudi Arabia

Tech Team

Jan 2024 – Feb 2024

- Ran penetration tests on the official event website using Kali Linux, Nmap, and John the Ripper to identify security weaknesses before public launch
- Cleaned raw survey feedback using Python and Pandas to identify peak attendance hours across three event days

24 Cafe — Al Faisaliyah District, Dammam

Data Analyst

Jul 2022 – Sep 2022

- Built monthly Power BI dashboards to process and analyze revenue and expense data, comparing performance against previous months
- Analyzed sales patterns to identify seasonal beverages as top revenue drivers, boosting sales by approximately 5%
- Applied data-driven insights to reduce drink and coffee bean wastage by 15%, raising monthly profits

Skills

Technical skills

- Programming Languages: Python, Java
- AI and Data Tools: Pandas, Power BI
- Deep Learning: Convolutional Neural Networks, Computer Vision, Object Detection (YOLO)
- Cybersecurity Tools: Kali Linux, Nmap, John the Ripper

Certifications

- Python Deep Diving — Udemy: Jun 2023 – Aug 2023
- IBM Java Developer Professional Certificate — Coursera: Jan 2025
- Python and Calculus Foundations — Coursera, KAUST AI Academy: Dec 2024

Languages

- Arabic: Native
- English: IELTS 6.0
